

BREAKDOWN MAINTENANCE SERVICE

In spite of planned maintenance also unexpected breakdowns of Air pollution Equipments & Material Handling Systems cannot be fully avoided due to various process reasons. We have system for attending such breakdown maintenance also. In this arrangement we study the plants of the client in advance, identify the vulnerable points for breakdown and keep alternatives ready to attend the breakdown repairs at the shortest notice possible.

Qualified technicians and spare parts and pre-assembled sub-assemblies are kept and immediately on breakdown intimation, our team will rush to the spot with tools and kits and will repair the plant within minimum time.

The trained maintenance team with tools and kits will be stationed at the plant on permanent basis if the severity of the breakdowns is high and if the client so desires.
